Quadraqua L	QDEB030Z xx	300	1828	300	24,9	500

- **xx** = colour option
- **Quadraqua Electric** is available only in "Serie Special" colours.

Controller Wireless

The new wireless controller allows complete remote management of every electric radiator function. The controller features a weekly program function that allows energy savings according to your lifestyle and routine. A different code is associated with each transmitter to avoid interference with nearby homes. Because they are wireless, the radiofrequency controllers offer the advantage of being quick and easy to install. Commands are transmitted via radio waves. The transmitter can even be placed on a piece of furniture. Because there are no wires, there is no need to carry out any modifications within the home.
